PROFESSIONAL SUMMARY

I'm a Data Analyst with a B.Tech in Information Technology, and most of my hands-on time has gone into SQL, Power BI, and Excel — building reports people actually use. I like turning messy business data into dashboards that make sense at a glance, and I've picked up Python, machine learning, and AI tools along the way for deeper predictive work. Over the past year I've automated a few reporting workflows and tightened up data accuracy for retail, sales, and operations teams.

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, SHAP)

Database: SQL, Oracle (Joins, Subqueries, CTEs, Window Functions, Stored Procedures), SQL Server

Visualization & BI: Power BI (DAX, Power Query, Data Modeling, Star Schema), Excel (Pivot Tables, VLOOKUP, XLOOKUP, Macros/VBA), Tableau, Data Visualization, Dashboard Design

AI & Automation: LLM-powered SQL generation (Groq API, Llama 3.3 70B), Natural Language-to-SQL, Streamlit

Web Scraping: Requests, BeautifulSoup, Selenium

Analytics: Data Cleaning, EDA, KPI Analysis, Statistical Analysis, Predictive Analysis

Business & Reporting: Business Intelligence, Report Automation, Dashboard Design, Stakeholder Reporting

Machine Learning (add-on): Logistic Regression, Random Forest, XGBoost, LightGBM

Deployment & Tools: FastAPI, Streamlit, Docker, Git/GitHub, Render, Jupyter/Colab

PROJECTS

[Blinkit Sales Analysis Dashboard](#) — SQL, Power BI, Excel, Power Query

- Pulled together a sales analytics dashboard covering 8,500+ records across several outlet categories, end to end.
- SQL joins and subqueries handled the heavy lifting on the data side; Power Query cleaned and modeled it before it hit Power BI.
- The dashboard surfaced Tier-3 outlets as the biggest revenue drivers, and cut reporting turnaround by 40%.

[AI SQL Query Generator](#) — Python, Groq API, Llama 3.3 70B, SQL, Streamlit

- Built a tool that lets non-technical stakeholders ask business questions in plain English and get back working SQL, powered by the Groq API and Llama 3.3 70B.
- It handles the whole loop — generating the query, running it, analyzing the result — which meant less manual query-writing for routine reporting.
- Wrapped it in a Streamlit dashboard using Python, SQL, and Pandas so anyone could query the database themselves and get AI-generated business insights back.

[Netflix Content Analytics Dashboard](#) — Python, Pandas, NumPy, Matplotlib, Seaborn

- Went through 8,800+ Netflix titles and put together 10+ visualizations covering genre, rating, and country-wise trends.
- Most of the effort here was in cleaning and feature engineering — the EDA that followed is what actually shaped the content-strategy insights.

[Credit Risk Intelligence Platform](#) | [Live Demo](#) — Python, Scikit-learn, LightGBM, Power BI-style reporting

- Trained an ML pipeline on 307,500+ records to predict loan default risk, then layered in SHAP so the results made sense to non-technical stakeholders too.

INTERNSHIP EXPERIENCE

Data Analyst Intern — Gateway Software Solutions, Chennai

Jul 2025 – Aug 2025

- Automated SQL and Power BI reporting for six KPIs — manual reporting time dropped by 35%.
- Ran EDA on customer and sales data and used what I found to help the team make faster, better-informed calls (about 15% more efficient, by their estimate).
- Rebuilt the Power BI data models around a star schema, which cut query load by 20% and made the whole thing noticeably faster to work with.
- Put together interactive dashboards and business reports for stakeholders, pulling from SQL, Excel, and Power BI depending on what the ask was.

Data Science Intern — QSpiders, Bengaluru

Jan 2026 – Jul 2026

- Worked through data preprocessing, EDA, and predictive modeling on real datasets using Python and SQL.
- Built dashboards and reports along the way, following the kind of practices you'd expect on the job.

EDUCATION

Bachelor of Technology, Information Technology

Shreenivasa Engineering College, Tamil Nadu | 2022 – 2026 | CGPA: 7.9 / 10.0

CERTIFICATIONS

- Data Science with Python — QSpiders (2026)
- Data Science for Engineers — NPTEL (2025)
- IBM AI Fundamentals — IBM SkillsBuild (2025)
- Soft Skill Development Certificate

SOFT SKILLS

Analytical Thinking • Problem Solving • Communication • Team Collaboration • Time Management • Adaptability
